Precise Positioning Service

APPLICATIONS

SURVEYING APPLICATIONS

For accurate determination of the position of points, professional surveyors are looking for innovative techniques, most advanced tools and productive solutions. Pak-Rehber Service offers precise positioning correction data to RTK enabled GIS/GNSS receivers for easy-to-use and cost effective precise positioning solutions.

- o Topography & Cadastral Surveying
- o Construction Survey
- o Control Surveying
- o Marine Survey

MAPPING & GIS APPLICATIONS

Mapping and GIS help in the collection, management and visualization of data, making decisions easier and quicker and optimizing operating expenses.

- o Mapping
- o Assets Management
- o Public Safety
- o Deformation monitoring

MACHINE GUIDANCE APPLICATIONS

The term Machine Guidance is used to describe a wide range of techniques which improve the productivity of agricultural, mining and construction equipment

- o Precision Agriculture
- o Precision Mining
